

Ep EFXZ-301-H Vorkheftruck

General features

Brand	Ep
Subcategory	Forklift
Construction year	2025
General condition	Very good
Fuel	Electric

Characteristics

Length	373cm
Width	123cm
Cabin	Open
Mast type	Triplex

Ep EFXZ-301-H Vorkheftruck

Description

Thorough overhaul process. The EFXZ-301-H undergoes a meticulous overhaul process at the EP overhaul production facility, which has a talented team and automated equipment. It includes extensive and thorough disassembly of used IC lift trucks, more than just cosmetic overhaul. The chassis, counterweight and front axle are thoroughly inspected and overhauled. The new core, EP's innovative lithium technology, replaces the motor to power the truck. The EFXZ-301-H combines the best of two worlds: the robustness of IC lift trucks and the advanced lithium drive system. Disassembly: Used IC trucks are carefully disassembled to separate chassis, counterweights and front axles from damaged or worn parts. Blasting and painting: Parts are cleaned to remove contaminants and restore them to usable condition. Reassembly: Remanufactured parts are reassembled in the lithium-ion lift truck. Key components are taken from EP's iconic and market-proven models, such as the mast also used in the EFL2 series, ensuring reliable performance and durability. Rigorous testing and quality control: The remanufactured forklift undergoes rigorous testing to ensure reliability and safety. Component Inspection: Parts are inspected for their potential for remanufacturing. Battery Capacity ●80V280AH
