Ep EP EFL 201 elektrische heftruck (2.000 kg)

General characteristics

Brand	Ep
Subcategory	Forklift
Year of construction	2026
Colour	Red
General state	Very good
Fuel	Electric
CE marking	Yes

Properties

Single weight	2.975kg
Length	331cm
Width	108cm
Cabin	Open
Max. lifting capacity	2.000kg
Lifting height	4.800mm
Mast type	Triplex
Clearance height	2.080mm

Description

The EP EFL 201 is the entry-level model of the EFL series of electric forklifts. With its lifting capacity of 2,000 kg. It is made with the same robust chassis as diesel forklifts, but as an electric forklift. It is suitable for outdoor use due to its large tyres and high ground clearance, but also works perfectly indoors. Better visibility through new mast The new mast is designed with fewer oil hoses, increasing visibility. Operators can always see the fork tips, load and surroundings clearly and transport goods safely. Outstanding ergonomic design Experience comfort like never before with ample legroom, adjustable steering wheel and comfortable bucket seat. So you can keep working longer without getting tired. 80V Li-Ion battery technology This modern battery not only offers efficiency and long operating time, but can also be recharged in between. Ideal for a flexible working day without interruptions. Grip on rough terrain The EFL201 has a generous ground clearance of 120 mm and is equipped with solid rubber tyres, making it effortless to drive over uneven terrain. The water-resistant design ensures that the truck can be used in all weather conditions. Ideal for transporting goods outdoors. Smart Safety Strategies Thanks to the Battery Management System (BMS), you always stay operational, even in case of unexpected battery problems. With the EFL201, you always drive safely back to the workshop. Multi-purpose charging options The EFL201 comes standard with EP's 80V/150Ah Lithium-Ion battery and an integrated 80V/35A charger. This enables fast and easy charging. The batteries have no emissions and are maintenance-free. Thanks to the powerful 80V motor, energy efficiency is higher than with a 48V motor. This ensures optimum productivity and strong performance in any working environment. Comfortable working The EFL201 is designed for maximum comfort. The accelerator pedal is positioned 40 mm forward for extra legroom, giving you more freedom of movement. Combined with the adjustable steering wheel and comfortable seat, you can work effortlessly, increasing not only comfort, but also your productivity and control behind the wheel.
